Ichhra • Lahore, 54000 • mawaisnadeem001@gmail.com • +92 323 1013949

Summary

Full-stack web developer working across React, Node.js and PHP/WordPress. Build custom WordPress themes, ACF-driven content systems, React dashboards and internal panels, and full 3D/interactive web tools. Improve performance by refactoring legacy code, cutting redundant queries, and lowering load times by 30–40% on key projects. Create custom Elementor widgets and Python automations that reduce manual tasks by up to 40%. Handle Analytics/Search Console setups with clean, verified tracking. Develop plugins and reusable components that keep projects maintainable and speed up internal workflows by up to 50%.

Experience

Primetech Solutions

Full Stack Web Developer

Lahore, PB

Sept 2025 – Present

- Build custom PHP/WordPress workflows and backend CMS integrations for bespoke cards, widgets and ad-hoc feature requests.
- Automated product schema markup generation across the catalog, removing manual structured-data entry.
- Develop fully custom template sections with deep CMS integration, giving editors full control over layout and content.

WordPress Web Developer

Jan 2022 – Jan 2024

- Developed site components primarily using clean, structured HTML and CSS.
- Delivered fully custom Elementor layouts and widgets without reliance on prebuilt elements.
- Improved front-end consistency and performance through optimized markup and styling practices.

BlueBoxPackaging

Full Stack Web Developer

Lahore, PB

Oct 2024 – Sep 2025

- Full-stack PHP and WordPress developer responsible for end-to-end web application development.
- Built custom WordPress themes in PHP and developed standalone React.js CMS solutions with integrated database management.
- Refactored legacy codebases, improved code organization, and optimized site performance.
- Developed self-contained plugins and code components aligned with SEO requirements.

Printech Solutions

WordPress Web Developer

Lahore, PB

Jan 2024 – Sep 2024

- Developed advanced WordPress pages and layouts using Elementor, ensuring responsive and high-quality UI implementation.
- Integrated and customized Advanced Custom Fields (ACF) to support dynamic, scalable content structures.
- Configured and integrated Google services, including Analytics, Search Console, reCAPTCHA, and Merchant Center, ensuring accurate tracking, security, and platform compliance.
- Collaborated on site improvements by optimizing and enhancing content management flexibility.

Projects

PMT — 3D Box Mockup Tool (React, Three.js)

- Full 3D box mockup and configurator tool: project dashboard, face-by-face artwork upload, materials and export, with authentication.

BYS Web (React, Node.js)

- React dashboard built for bumpyourserver.xyz, a Discord server-bumping bot.

Tiny Looms (Shopify, Liquid)

- Shopify storefront for a kids' clothing brand: custom home page build, catalog styling and seasonal campaign sections.

Pack Prestige (WooCommerce, WordPress, PHP)

- Custom WooCommerce packaging store: full product catalog, quoting flow and custom checkout logic for a made-to-order box brand.
